**Re: Promoting Interoperability in the 700 MHz Commercial Spectrum,
WT Docket No. 12-69**

Dear Ms. Dortch:

On July 10, 2017, AT&T submitted its final progress report on Interoperability in the 700 MHz Commercial Spectrum to indicate that it had satisfied all of the requirements of the Interoperability Agreement, other than the implementation of the standards-based S8 Home Routing (S8HR) architecture. During a subsequent meeting with the Commission's Public Safety and Homeland Security Bureau July 31, 2017 to discuss AT&T's the final report, we indicated that we would notify the Bureau once the S8HR Architecture was fully implemented. I am filing this letter to provide notice to the Bureau that we completed that implementation as of April 30, 2018.

Pursuant to the Commission's rules, a copy of this notice is being filed electronically in the above-referenced docket. Please do not hesitate to call me if you have questions.

Sincerely,

/s/ Joseph P. Marx
Assistant Vice President, AT&T Services Inc.
